

Changing SIM in the GSM Device

- 1. If you are replacing a SIM then firstly remove power to the device.**
- 2. If you are changing a SIM you need to ensure that the new SIM meets requirements:**

See Technical note “Requirements for a new SIM” (tech note 7 GSM no SIM installed UK web.pdf).

- 3. Also Note that the telephone Numbers programmed into a device may be stored on the SIM. So you will have to re-program these numbers into the new SIM using your mobile phone. To see which 2T products use the SIM to store telephone numbers:**

See Technical note “Requirements for a new SIM” (tech note 7 GSM no SIM installed UK web.pdf).
